SKILLS

- JavaScript
- TypeScript
- React Native
- Next.js
- Node.js
- GCP
- Firebase
- CI/CD
- Git
- Generative AI

CERTIFICATIONS

- Data Science With Python – Simplilearn (2019)

PROFESSIONAL SUMMARY

Innovative and results-oriented Software Engineer with over 7 years of experience in designing, developing, and deploying robust mobile and web applications. Demonstrated success in leading development teams and enhancing collaborative Agile environments, resulting in a 70% increase in project efficiency. Proficient in TypeScript, React Native, Next.js, and Node.js, leveraging cloud architectures to address complex business challenges and deliver high-performance user interfaces.

KEY PROJECTS

JiffyBook App

Cross-Platform Digital Commerce & Engagement

Technologies: React Native, Next.js, Node.js, Google Cloud Vertex AI, Firebase, Firestore, Stripe

- Developed a robust cross-platform application that enabled over 50 brands to efficiently manage catalogs, process orders, and execute integrated loyalty programs, resulting in a 30% increase in customer retention.
- Leveraged Google Cloud Vertex AI and Imagen API to create dynamic prompt workflows, significantly boosting user engagement by 25% and enhancing content creation capabilities.
- Designed and implemented serverless backend functions on GCP utilizing Firebase Firestore, achieving real-time updates and push notifications, which improved user interaction by 40%.

WORK EXPERIENCE

Software Engineer

- **InDreamer Techol Pvt Ltd**

Mar 2019 - Present

Spearheaded end-to-end mobile development using React Native; managed publishing to Apple App Store and Google Play Store for the JiffyBook application.
Engineered high-performance web applications using Next.js, significantly improving SEO scores, render efficiency, and initial page load times.
Architected and implemented an AI feature leveraging Google Cloud Vertex AI and Imagen API, enabling dynamic prompt-selected high-fidelity image generation.
Designed and deployed scalable serverless backend functions using Node.js and Firebase on Google Cloud, implementing real-time data sync and instant push notifications via OneSignal.
Developed a comprehensive library of reusable React components ensuring UX consistency across platforms.
Integrated Stripe for secure payment processing, Mailgun for transactional emails, and Twilio for secure SMS and WhatsApp messaging.
Oversaw app UI internationalization and translation across 4 languages to support global expansion.
Led and mentored a team of developers, enforcing code quality through peer reviews and facilitating Agile ceremonies.

EDUCATION

Bachelor of Science in Computer Science

Rajiv Gandhi Institute of Technology

Aug 2014 - Jul 2018
